

capzlog.aero Expands Auto-Import Capabilities with Leon Integration

Geneva, Switzerland — 20–22 May 2025

capzlog.aero, the officially certified digital pilot logbook platform, has expanded its Auto-Import feature to support direct integration with Leon Software, one of the most widely used crew scheduling platforms in Europe.

With this integration, thousands of pilots flying for operators using Leon can now benefit from fully automated, real-time updates to their personal logbooks. Flight time data is imported directly into the pilot's capzlog.aero account—eliminating manual entry, reducing errors, and ensuring EASA-compliant recording according to FCL.050.

capzlog.aero is built as an **independent and pilot-centric logbook**, separate from the operator's systems. This allows pilots to maintain a complete and continuous record of their flight experience, regardless of their current employer. The platform serves as a **single source of truth** for pilots logging time across multiple operators, as flight instructors, or in military flying roles—supporting accurate cumulative time tracking and regulatory compliance with **ORO.FTL.245**, including cross-operator limits.

"This integration reinforces our vision of a pilot-controlled, independent logbook that reflects the reality of today's complex flying careers," said Philippe Mueller, CEO of capzlog.aero. "With automated data import from Leon and other integrations, capzlog.aero ensures that pilots stay compliant and always have access to their verified flight history."

About capzlog.aero

capzlog.aero is a modern, EASA-compliant digital pilot logbook designed for professional pilots. Certified according to AMC1 FCL.050, the platform meets the requirements of Commission Regulation (EU) No. 1178/2011 and ORO.FTL.245, including cumulative time tracking across employers. With a focus on automation, compliance, analytics, and seamless integrations, capzlog.aero empowers pilots to take control of their records—ensuring they remain accurate, portable, and always audit-ready.
